

CITY OF HOLLAND

SUPPLEMENTAL TAX ABATEMENT QUESTIONNAIRE

Please respond to the following questions as completely and accurately as possible. Please type or print clearly in black ink. This information is necessary for the City to properly review your application for an Industrial Facilities Exemption Certificate, and the impact of the proposed project on City services. Three (3) copies of the questionnaire must be provided along with your application for an Industrial Facilities Exemption Certificate or as soon as possible thereafter. **If building construction is a part of the project, a site plan must also be provided.** A hearing on the requested IFEC will not be scheduled until such time as the completed questionnaire has been received.

1.) Describe the location of the project in terms of the public street system serving the facility. Is the facility located on a public or private road? Will the existing road be adequate to serve the facility? What types and how much additional traffic do you anticipate will result from the project?

2.) Describe your proposed method for handling storm water retention and drainage issues. Have you obtained the necessary permits? Is the public storm drainage system in the area sufficient to serve your needs? Have you reviewed this with the City's Department of Community Services and Development?

3.) There are some industrial projects which may utilize water in specific manufacturing processes that could have a "significant" impact on the water and/or sanitary sewer system. If your project utilizes domestic water for some wet process, please describe the flow requirements in terms of peak flow (GPM) and average daily flow GPD Also, please describe the wastewater characteristics that will be disposed into the sanitary sewer in terms of average daily flow (GPD) and peak flows (GPM) and wastewater composition (BOD, SS, phosphorous, etc.). Will your discharge achieve Holland City Ordinance limitations? If not, what form of pretreatment will be utilized?

4.) If your project will require the installation of a fire suppression system, please describe the fire flow (GPM) requirements of your facility.

5.) Describe how your, project will impact on police and fire services currently provided by the City. Will your demand for such services increase? In what ways? Will the project require the fire department of the City to procure any new or additional equipment: or training to respond to the particular types of materials utilized in your operation?

6.) Does your facility currently meet all zoning and building code requirements? If not, please explain. Are there any variances or special use exception permits in existence for your property?

7.) Are there any unique features to your operation which might give environmental implications to the project; i.e., air quality, water quality, potential site pollution, odors, or excessive noise or vibration from the operation of the equipment?

Please describe the environmental implications, as well as any steps you plan to take to mitigate such factors.

8.) Please describe the number of additional employees that are anticipated to be hired as a result of this project and identify whether they are full or part-time, their skill level, the EEOC employment categories and their pay range.
