

Snow Storm 1/25/14 - A message from Public Safety

Please remember that shoveling around fire hydrants is critical to do so that snow does not become compressed against them. The time lost during an emergency could lose a home when in flames.

Given the depth of snow and windy conditions, sidewalk plow operators have switched to using snow blower attachments and the process is not going as quickly as the crew would like. Please help out by clearing paths on the sidewalks adjacent to your home as this is especially beneficial to the mail service and the elderly. Thank you for all of your help this winter!
