

Parks & Recreation

With an increased emphasis being placed on "quality of life," we are more aware than ever before of the important role leisure and cultural activities play in our lives and the lives of our youth. The City of Holland, through its Parks & Recreation Department, is committed to meeting the growing needs of our citizens for constructive, creative and meaningful free time activities.

We encourage you to use and support our many beautiful park facilities. The City has been committed to renovating and building parks that the community is proud of and enjoys using. We also provide many services, which our citizens use and support.

Please use and enjoy your Department of Parks & Recreation and thank you for your continued support.
