## Resident/Nonresident Definition

Any person whose legal residence or domicile is within the corporate limits of the City of Holland as evidenced by a drivers license, voter registration, or other documentation required by the City to establish residence or domicile.

In implementing the definition of resident, the City of Holland, acting through its employees and/or representatives, may request such documentation or information to establish that a person is a resident or domicile. In the event a person seeking the status of resident or domicile fails to file the appropriate documentation required to establish the necessary qualification for a resident fee, the City of Holland shall apply the non-resident fee to the requested services and fees to be paid.

If a person who meets the definition of a resident is forced to move from their place of residence by medical necessity and this is documented by a letter from their attending physician, the Superintendent may allow their charges to be based on the resident rate for purpose of determining cemetery fees.

*All cemetery fees are set yearly by City Council.*

*All fees and charges must be paid prior to the opening of a grave for burial.*

*Revised 2021*
