

Pine Avenue and 11th St Reconstruction Start of Construction

Milbocker, the general contractor for the Pine Avenue Project, has a planned start date of Monday, May 16th, 2022. Work will start with milling removal of the pavement in the project limits. Construction in Pine will be phased and is expected to start at 9th St and proceed southward. Progress will depend on the availability of materials and weather. 22nd Street was removed from the current scope of work due to material delivery schedules and the ability to finish the scope this year.

During the course of the work it may be necessary to temporarily shut down the water mains on the side streets to connect them to the new main. BPW door hangers will be placed on front doors prior to any water shut offs. Service connection work will be coordinated with the homeowners directly by Milbocker. Issues of concern during construction can be raised to the Wightman Onsite Inspector for the quickest response.

PROJECT CONTACTS:

Gordy Atwood	Nate Wienberg	Mark Gipson	Ryan Ng
Milbocker Foreman	Wightman Associates Onsite Inspector	Water/Wastewater Services Holland BPW	Transportation Services City of Holland
269.377.7080	269.924.2556	616.355.1644	616.928.2427

Remember to label trash cans with house numbers.

Plan alternate routes as needed to avoid crossing construction trenches.

Flag irrigation systems to limit damage from construction.

If applicable, please be sure to share this information with your tenants and inform them of the upcoming construction.
